Tips To Prevent A Costly Water Leak

Cover all vents and openings in crawl spaces to prevent drafts that will freeze water pipes

Know where your water shut off is located *inside* of your home

Winterize your outside spigots *before* temperatures dip below freezing

If your home will be vacant for an extended amount of time, make sure there is a sufficient temperature to keep your pipes from freezing. Consider having the water turned off.

To have your water turned off, please call us at 609-894-3373

Pemberton Township Water Division
